Electronic Devices That Help You Learn English

There are many ways to learn English. With the increase in new technology, many companies are now providing new electronic devices to help people learn English more quickly.

You can download the lessons from an English translation Internet site and put them on your iPod. Because it is portable, you can listen and learn anywhere.

English audio tapes and English audio CDs are a great method of learning English. All you need is a cassette or CD player. You can learn in many locations including your car.

An electronic translator or electronic dictionary is an excellent tool one can use when traveling on a vacation, on a business trip, studying languages, conversing with foreign people, and in a variety of other situations. Many devices have a number of attributes that include advanced text-to-speech and voice recognition technologies. There are many good-quality electronic dictionaries on the market. Depending on which one you purchase, there is an extensive range of vocabulary that can include up to one million words or more. There are also electronic dictionaries that contain common expressions and phrases, grammar references, and much more. Two popular hand-held English electronic dictionaries include the Talking Electronic Dictionary and the Audio Phrasebook. They include hundreds of thousands of words, definitions, and thesaurus entries. You can view the word on the screen and hear it spoken. It is likely that you have your own language interpreter. Just speak into the device and you will be provided with an intelligible translation voice response.

Choosing an electronic device that helps you learn English has made learning and speaking English easier, faster, and more enjoyable. Before you purchase a device, make sure you research each product to find the English learning tool that complements your lifestyle.

Ex 2: Read the passage, and decide whether the following statements are true (T), false (F), or not given (NG).

Electronic learning is a technology of education that implies self-motivation, communication, efficiency, and technology. E-learning is effective as it eliminates distances because the e-learning content is designed with media that can be accessed from properly equipped computers, and other means of internet accessible technology.

E-learning has its own advantages. However, the most important advantages lay in the reduction of time, efforts and cost.

Furthermore, we can talk about the following advantages of E-learning with the increasing of communication between the student and themselves and between the student and the school a fast and easy way is needed to bring everybody together.

Throughout different directions such as discussing forums, e-mail, and chat rooms, researchers think that these things increase and motivate students to participate and react with the subjects in question.

Another advantage of e-learning is that it makes all students feel equal. Since the communication tools give each student the opportunity to express his own opinion clearly and directly at any time without being embarrassed, in contrary to the traditional teaching halls which don't have such a feature due to the bad distribution of the tables or because of shyness or other reasons.

E-learning provides teachers with great facilities that are accessible out of working hours, that is because the learner can send the inquiries to the teacher through the e-mail at any time, yet this feature is more useful and suitable for the teacher instead of being restricted at his desk.

By e-learning the attendance is not necessary as the new technology provides the communication methods without the need to be available in a specific place or time.

1. With e-learning, students from many parts of the country can have lessons with the well-known teachers.
2. With e-learning, students can save a lot of time, efforts, and money.
3. The discussing forums and chat rooms provide opportunities to exchange and share the point of views.
4. This type of e-learning gives the complete opportunity to the student to express themselves clearly and directly although it also brings many problems to them.
5. Students can get over their shyness by taking part in online communication.
6. The bad distribution of the tables in the traditional teaching halls made students shy, and unable to answer the questions.
7. Teachers will be restricted at his desk to work with computers in e-learning.
8. By e-learning students needn't come to class any more.
