## Ex 3:

1. Negative impacts from tourism occur when the level of visitor use is greater than the environment's ability to cope with this use.
2. It causes soil erosion, increased pollution, discharges into the sea, natural habitat loss, increased pressure on endangered species and heightened vulnerability to forest fires.
3. It causes water shortages, degradation of water supplies, and a greater volume of waste water.
4. Because they require an enormous amount of water every day and, this can result in water scarcity.
5. Because a high demand is placed upon these resources to meet the high expectations of tourists.
6. Because tourists on expedition leave behind their garbage, oxygen cylinders and even camping equipment.
