## UNIT 9: WRITING-PRESERVING THE ENVIRONMENT - KEY

ĐĂNG KÍ CHƯƠNG TRÌNH HỌC TRỰC TUYẾN TẠI VINASTUDY.VN QUA 0932.39.39.56

**KEY:****Ex 1:**

1. Agriculture uses soils and water as a resource for food production.
2. At the same time, it impacts on these resources.
3. Agricultural production continues to rely on inorganic fertilizers and pesticides.
4. Inappropriate farming practices lead to soil erosion and nutrient loss.
5. Soil erosion is the removal of soil by wind and water.
6. Erosion can lead to soil degradation and eventually complete destruction.

**Ex 2:**

1. Both African and Asian elephants play such an important role in their ecosystems, and contribute to tourism and community incomes in many areas.
2. We try to conserve their habitat, support local communities, and make natural resources available for coming generations.
3. WWF works to conserve elephants on both continents through **specific** programmes.
4. The programmes aim to improve elephant protection and management, reduce poaching and the illegal ivory trade.
5. We shouldn't buy ivory products because the illegal trade in ivory is one of the greatest threats to elephants today.

**Ex 3:**

1. Vietnamese organizations and individuals should work together to solve the problem of water pollution.
2. People should use less chemical fertilizers, and go in for organic farming.
3. We try not to throw waste into rivers, lakes, streams or seas.
4. The government requires all the companies to follow the regulations strictly.
5. It is very necessary to raise people's awareness of the important role of water in their daily activities.
